

This document serves as proof to daily Scrum meetings. It will keep track of what every person does every day.

## 21 April 2021

### **Lindani Dlamini (1712359)**

So, I have personal bot that I try stuff on, on the side. I have been trying to integrate MySQL with it then see if I can actually contribute something, but I am just not getting anywhere.

### **Matthew Simon (2095294)**

I am going to spend the next few days setting up a rough version of my idea for the server queue just so that we can tell whether you can write tests on it or not.

### **Ahmed Luqmaan Kharsany (1610083)**

Spent today researching the deletion of files with specific extensions. Will spend tomorrow and Friday attempting to implement it and test it. Will probably ask Nabeel for help with writing tests for it.

### **Zaneli Steeneveldt (2090475)**

Busy working on the use case diagram at the moment. Going to wait until closer to the due date to finish the UML diagram so that it is up to date with the code when we hand in.

### **Mohammad Nabeel Uppel 2090704**

I am currently working on SQL implementation.

### **Neeloufah Alli ( 2095284)**

Currently working on some code to remove files with specific extensions

### **Atlast Khorombi Ganyane (2181532)**

I know we agreed on using SQL implementation, but I am still learning how to use Firebase to add something on our database, this will be helpful if the SQL implementation gives us a problem.

## 22 April 2021

All team members were still working on the same things as the previous day.

## 23 April 2021

### Ahmed Luqmaan Kharsany (1610083)

Added the deletion Cog to Blackbox but ran into some issues with .env... So, I started researching if we could store the files before they were deleted so that if the lecture wants to, at any time see what was sent, they would be able ( it's just an idea and hopefully we will not have to do it cos it looks like work)

### Neeloufah Alli ( 2095284)

Added the delete cog code to my branch on git going to start looking into the test stuff for it

### Lindani Dlamini (1712359)

Got the bot to talk to a MySQL database

## 24 April – 2 May 2021.

No work discussed; it was recess.

## 03 May 2021

### Mohammad Nabeel Uppel (2090704)

Wrote test cases for SQL methods

No updates from the rest of the team.

## 04 May 2021 – 09 May 2021

All work for sprint 2 is completed.
